PROFILE

Backend Developer with 2+ years building and shipping production SaaS, fintech, and e-commerce platforms in PHP and Laravel. Delivered 4 core systems with multiple payment-gateway integrations and deployed 50+ applications across Linux/VPS environments. Focused on clean REST APIs, system optimization, and reliable production deployments.

EDUCATION

Web Application & Development
IsDB-BISEW
Course Topics:
PHP, JavaScript, Laravel, AngularJS, WordPress, ReactJS, CodeIgniter, Vue.js
Round - 54

BSc in Statistics
Dhaka College
2015-2021

TECHNICAL SKILLS

Languages: PHP, JavaScript (ES6), SQL
Frameworks: Laravel, jQuery (exposure: Vue.js, React, CodeIgniter)
Databases: MySQL — schema design, query optimization
APIs & Integration: REST API design, Postman, payment gateways (SSLCommerz / Stripe / PayPal)
DevOps & Deployment: Linux servers, VPS, cPanel, aaPanel, Hestia, Git/GitHub, production deployments
Practices: Live production debugging, multi-role authentication, OTP/auth systems

PROFESSIONAL EXPERIENCE

Jr. Software Engineer (Backend) — AppDevs (FinTech Software Company), Dhaka
07/2024 – 03/2026 | Mirpur, Dhaka

- Built and maintained **4 core backend systems** with multiple payment-gateway integrations, supporting multi-role access for Admin, Vendor, and Manager dashboards.
- Deployed and maintained **50+ projects** across Linux, VPS, cPanel, aaPanel, and Hestia environments, standardizing rollout steps to reduce deployment issues.
- Debugged and resolved production incidents in real time, improving reliability and cutting recurring bug reports **from 40% to 20%**.
- Designed and documented REST APIs consumed by web and mobile clients.

Jr. Laravel Developer — 2aIT Limited, Dhaka
02/2024 – 06/2024

• Developed features across diverse Laravel applications: real estate, hotel management, ERP, and accounting.

- Contributed to government projects, collaborating with senior developers on delivery timelines.

LATEST TECHNICAL PROJECTS

adMart - Online Grocery Shopping | eCommerce | Pharmacy Solutions
PHP | Laravel | MySQL | jQuery | REST API

Live order tracking, mobile OTP login, multi-gateway payments, delivery-zone management, and a dedicated Driver Panel for end-to-end delivery.
